PROFESSIONAL SUMMARY

Recent Computer Science graduate with 5+ years of professional experience in a high-accuracy, regulated environment. Brings a unique perspective combining technical development skills with real-world systems thinking. Eager to contribute to a software engineering team and grow through hands-on development.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, C++, SQL, HTML/CSS, Bash

Frameworks & Tools: Flask, React, Node.js, Git, Linux, XAMPP/Apache, REST APIs

Concepts: Object-Oriented Programming, Data Structures, Machine Learning (Foundations), Agile

PROJECTS

Loudify PHP · Apache · XAMPP · MySQL

- Full-stack music streaming application modeled after Spotify, featuring user authentication, playlist management, and custom audio playback controls.
- Designed normalized MySQL schema for users, tracks, and playlists; deployed locally via XAMPP with an Apache/PHP backend.

MedTracker Python · Flask · SQLite · HTML/CSS

- Web application for managing personal medication schedules, including dose logging, reminder settings, and a usage history dashboard.
- Leveraged pharmacy domain expertise to design realistic medication safety workflows and validation logic.

Portfolio Website HTML · CSS · JavaScript

- Responsive personal developer portfolio built with semantic HTML5 and CSS Grid — no frameworks. Features smooth scroll, mobile layout, and project showcase sections.

CLI Budget Tracker Python · CSV · argparse

- Command-line tool for logging, categorizing, and summarizing personal expenses. Supports CSV import/export and generates monthly spending summaries via terminal.

MarketSim — Day Trading Pattern Trainer Python · Pandas · Plotly · FastAPI · React | In Progress

- Interactive simulator for learning technical analysis and day trading pattern recognition using real historical OHLCV candlestick data.
- Scores user predictions against actual outcomes to build pattern intuition; full-stack architecture with a FastAPI backend and React frontend.

The Big Cheese — RL Maze Agent Python · NumPy · Gymnasium · Matplotlib | In Progress

- Reinforcement learning environment where an agent learns to navigate a maze and reach a goal through reward shaping and Q-learning.
- Three difficulty levels (5×5, 10×10, 15×15) with increasing trap complexity; visualizes the agent's improving policy over training episodes.

PROFESSIONAL EXPERIENCE

Pharmacy Technician2019 – Present

Various Retail Pharmacies — Aurora, CO

- Processed 100+ daily prescriptions with a high degree of accuracy in a regulated, fast-paced environment, developing strong attention to detail and error-checking discipline.
- Operated pharmacy management systems including QS/1 and PioneerRx; adapted quickly to software updates and new platform rollouts.
- Collaborated cross-functionally with pharmacists and healthcare providers, building clear communication habits in high-stakes settings.
- Trained and mentored incoming technicians on standard operating procedures, compliance requirements, and workflow best practices.

EDUCATION

University of Colorado DenverMay 2026

Bachelor of Arts in Engineering and Computing · GPA: 3.2
